

Duration: 5 hours

Course level: Introductory

Delivery method: Online

Introduction

The way a business communicates with customers, employees and other organisations can have a huge influence on its success and productivity.

The famous psychologist Albert Mehrabian demonstrated that the way people take in information during a presentation is 55% visually, 38% vocally and only 7% through text. Put simply, a strong visual presentation will make your audience remember you – and your message.

This course will help businesses master the basics of **PowerPoint 2000**. PowerPoint is a presentation package that allows users to create, modify, print and deliver engaging visual presentations at meetings, conferences and over the internet.

This course shows employees how to use PowerPoint to prepare effective presentations so that they can get their message across clearly – saving time and improving business performance.

Who is the course for?

PowerPoint 2000 is ideal for business owners, team leaders, managers or anyone who needs to prepare and deliver presentations.

The easy-to-follow, step-by-step format is perfect for people who are completely new to PowerPoint, while the high level of detail will suit those who have a basic understanding but want to learn more about the different features and functions.

There are no formal entry requirements, but familiarity with Windows-based packages is expected.

To get the most from this course access to Microsoft PowerPoint is advised. For a different version of PowerPoint, we also offer courses in **PowerPoint 2003** and **PowerPoint XP**. To learn how to prepare presentations for a variety of tasks, why not consider **ECDL 6 – Presentations**, which can be used to work towards the ECDL qualification.

What will you get from this course?

When you have completed this course, you will be able to:

- create, modify and print business presentations
- use templates to build your presentations
- enhance your presentations with charts, tables and drawing tools
- run simple, customised or animated slide shows.

Course features

You can start your online course straight away and access it at any time, providing you have access to a computer with an internet connection. The course is available for six months from the date first accessed.

The course will show you how PowerPoint's features and functions work, which you can then practice for yourself. You are in control at all times, so you can work through the course at your own pace and focus on the modules you are most interested in, or least familiar with. As you work through the course, you can print specific sections out to refer back to later if you wish.

When you've finished the course, you can complete an online assessment to put your new skills to the test. The results of this test can be printed out, as a record of how well you've done. Or you can use the test as a diagnostic tool before you start the course and study only the topics/modules you need to.

Course modules

1. PowerPoint 2000 Basics

- Introducing PowerPoint
- Screen Components
- View Buttons
- Opening, Saving and Closing

2. Creating, Saving and Closing Files

- Creating New Presentations
